MINING PLAN

PLATE 3-2

● BASED ON CURRENT DRILL HOLE DATA, COAL SEAM THICKNESSES IN THE COAL SEAM ARE REDUCED. THIS IS DUE TO PARTINGS IN THE COAL SEAM. IN ADDITION, THE POINTING FOR SEAL RECORDING FROM OFF-SEAM RECORDING IS APPROXIMATELY 3800 FT. WIDE BY 3900 FT. LONG AND IS TENDING IN A NORTHEAST DIRECTION, AS INDICATED BY THE DOTTED LINE. THE PLAN IS BEING PREPARED WITH REGARD TO TEND EXTENT AND THE RELATED IMPACT ON MINING AND COAL QUALITY.
